EXAMINER'S AMENDMENT

This Action is in response to an After Final Amendment filed January 10, 2006. Claims 1-3,6-9,11-15,18-21,23-27,30-33, and 35-39 are currently pending.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Betty Formby on February 2, 2006.

The application has been amended as follows: Please see attached.

2. The following is an examiner's statement of reasons for allowance: The prior art fails to show a system that performs a bulk read as disclosed by the applicant. Specifically, the prior art does not address storing a bulk read size in a socket structure associated with a receive buffer. The prior art is further distinct from the instant application because it fails to show activating the bulk read function in response to setting of a flag in the socket structure and informing a sending device that a full window size of data is available in the socket receive buffer, if the flag is set and the amount of data stored in the socket receive buffer is less than the bulk read size.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip J. Chea whose telephone number is 571-272-3951. The examiner can normally be reached on M-F 7:00-4:30 (1st Friday Off).
